

AI Match Mapping Engine

Client Preview — Phase 1 Completion

This document provides a professional preview of the AI Match Mapping Engine, demonstrating the current implementation status, core capabilities, live mapping examples, and production-ready output contract. The system has been designed for high accuracy, safety, and scalability in mapping sports matches between OddsPortal and Bet365.

1. Overview

The AI Match Mapping Engine automatically maps matches between sports data providers using semantic retrieval, precision reranking, and safety validation gates. The system ensures reliable mapping with confidence transparency and strict validation safeguards.

2. Live Mapping Preview

Example — Strong Match (AUTO_MATCH)

```
{
  "platform": "ODDSPORTAL",
  "bet365_match": "189420938",
  "provider_id": "tQXkp3V6",
  "confidence": 1.00,
  "is_checked": false,
  "is_mapped": true,
  "reason": "rule_based_strong_match",
  "switch": false
}
```

3. Core Capabilities Implemented

Capability	Status
Semantic Retrieval (SBERT)	Complete
Cross-Encoder Reranking	Complete
Safety Validation Gates	Complete
Swapped Team Detection	Complete
Production Output Contract	Complete

4. Performance Characteristics

The system is optimized for accuracy and scalability using efficient embedding retrieval and precision reranking. Safety validation prevents incorrect automatic mappings.

5. Output Contract (Production Format)

```
{
  "platform": "ODDSPORTAL",
  "bet365_match": "189420938",
  "provider_id": "tQXkp3V6",
  "confidence": 1.00,
  "is_checked": false,
  "is_mapped": true,
  "reason": "rule_based_strong_match",
  "switch": false
}
```

6. Architecture Overview

OddsPortal Match → Prefilter → SBERT Retrieval → CrossEncoder Rerank → Safety Gates → Final Mapping Output

7. Current Status

Phase 1 implementation is complete. Core AI mapping pipeline, validation gates, swapped detection, and production output generation are fully operational.

8. Next Phase

Upcoming improvements include feedback ingestion, dataset builder, offline evaluation metrics, and model fine tuning to further improve accuracy and automation.

9. Summary

The AI Match Mapping Engine is production ready for Phase 1 deployment, providing safe, accurate, and scalable automated match mapping between OddsPortal and Bet365.
