

AI Match Mapping Engine — Client Preview

Overview

This document presents a live preview of the AI Match Mapping Engine designed to automatically map sports matches between OddsPortal and Bet365 using advanced semantic retrieval, AI reranking, and strict safety validation gates. The system produces structured mapping outputs with confidence scoring and safety flags.

Example 1 — Strong Match (AUTO-MATCH)

```
{
  "platform": "ODDSPORTAL",
  "bet365_match": "189420938",
  "provider_id": "tQXkp3V6",
  "confidence": 1.00,
  "is_checked": false,
  "is_mapped": true,
  "reason": "rule_based_strong_match",
  "switch": false
}
```

Example 2 — Swapped Home / Away Detection

```
{
  "platform": "ODDSPORTAL",
  "bet365_match": "189420939",
  "provider_id": "tQXkp3V6",
  "confidence": 0.99,
  "is_checked": false,
  "is_mapped": true,
  "reason": "rule_based_strong_match",
  "switch": true
}
```

Example 3 — Category Mismatch Protection

```
{
  "platform": "ODDSPORTAL",
  "bet365_match": "b20",
  "provider_id": "op_003",
  "confidence": 0.73,
  "is_checked": false,
  "is_mapped": false,
  "reason": "category_mismatch",
  "switch": false
}
```

Core Capabilities Implemented

Capability	Status
Semantic Retrieval (SBERT)	Complete
Precision Reranking (Cross-Encoder)	Complete
Swapped Team Detection	Complete
Safety Validation Gates	Complete
Structured Output Contract	Complete
Production-Ready API	Complete

Architecture Overview

Summary

The AI Match Mapping Engine is now fully operational and capable of safely and accurately mapping sports matches between providers. The system includes confidence scoring, swapped detection, category validation, and structured output compatible with production integration.
